

JAIKAR POTHULA

TECHNICAL UI DESIGNER

San Francisco, CA | jaikardevgame@gmail.com | jaikarpothula.com | [LinkedIn](#)

PROFILE

Technical UI Designer specializing in system-driven and narrative-integrated interfaces for games and interactive applications. Experienced in Unreal Engine 5 and Unity, translating complex gameplay systems into scalable, production-ready UI frameworks. Focused on usability, readability under pressure, and fast iteration pipelines.

CORE TECH STACK

UI/UX DESIGN Wireframes, user flows, HUD, menus, progression systems, narrative UI

GAME ENGINES Unreal Engine 5 (UMG, Blueprint), Unity (Canvas, C#)

TOOLS Figma, Adobe Photoshop, Illustrator, After Effects

SYSTEMS Modular UI frameworks, gameplay systems, interaction design

OTHER UI animation, VFX integration, Git workflows

OPERATIONAL EXPERIENCE

UI Systems Designer (Internship)

Vault Productions (Remote)

Nov 2025 – Present

- Led implementation of UI systems for a psychological horror game in Unreal Engine 5.
- Designed a 3D Investigator Journal integrating objectives, clues, and gameplay state.
- Built modular Blueprint UI architecture improving iteration speed by 25%.
- Collaborated with cross-functional teams to align UI with gameplay and narrative.
- Presented a live playable build at GDC 2026 to an international audience.

Game Development Intern

Academy of Art University

Sep 2025 – Dec 2025

- Developed gameplay systems within a collaborative team environment.
- Translated design concepts into in-engine implementations.
- Iterated UI/UX based on playtesting and feedback cycles.

UI Designer

Freelance

Mar 2025 – Aug 2025

- Designed UI/UX for a fantasy RPG including menus and interaction flows.

- Created high-fidelity UI assets aligned with gameplay progression.
- Improved usability and reduced player friction through structured UX.

MISSION LOG: PROJECTS

The Dark Arrival: Shadows of the Past

UI/UX Artist & Technical UI Designer (UE5)

- Owned full UI pipeline: HUD, menus, interaction systems, and narrative overlays.
- Designed systems for investigation, storytelling, and player decision tracking.
- Delivered a live demo showcased at GDC 2026.

Suite 13

UI Systems & Gameplay UX

- Developed gameplay UI systems and reusable UX components.
- Focused on interaction clarity and scalable system design.
- Built structured UI flows to support gameplay mechanics and player feedback.

Customized Angel

Designer & Programmer (Unity)

- Built a 2D game prototype in a 5-member team.
- Designed timeline-based UI for visual and audio clue tracking.
- Implemented UI animations and interaction systems.
